## Thematic analyses

### Equality

20/01/2023

The COVID-19 pandemic has had a major impact on all citizens and exposed or exacerbated existing inequalities. It created challenges for health and mental well-being, educational achievement, access to services, and more generally inclusion in the labour market, economy and society. Despite policy efforts to mitigate the impact of the pandemic, further and continuous action will be required. The Recovery and Resilience Facility contributes in many ways to improving equal opportunities, both directly and indirectly. The national recovery and resilience plans contain targeted investments as well as important reforms that are expected to have a lasting effect on equality, also increasing resilience. The Facility will contribute to gender equality and improve inclusion of disadvantaged groups, such as persons with disabilities, people with a migrant background, and Roma

## suspensions of payments of pre-financing.

### Conditionality mechanism

The Council adopted an implementing decision under the Conditionality Regulation with regard to Hungary. The decision imposes measures to **protect the Union budget against breaches of the rule of law** principles in the areas of public procurement, prosecutorial action and the fight against corruption. These measures include a **suspension** of budgetary commitments from three operational cohesion programmes. The measures adopted in the implementing decision are temporary and can be lifted by the Council, acting on a proposal from the Commission, without loss of Union funding, if the situation is fully remedied within two years.
